

Environmental Policy Statement

We are a long-established provider of electrical services, power installation management and power consulting to the event and exhibition industry.

We ensure that all of our activities comply fully with relevant environmental legislation, the outline requirements of ISO 14001 and perceived best practice, and by the setting of objectives for continual improvement of our environmental management practices.

To deliver this policy we will:

- Maintain awareness of information on the environmental impact of the goods and services we supply and make this available to enable our customers to make informed choices
- Understand the sensitivities of our customers, including the pressures of growing and changing statutory and public concern about environmental issues, and assist them in complying with environmental best practice
- Identify opportunities to reduce any environmental impact of our activities at an early stage and adopt these changes where appropriate
- Communicate its environmental performance both within the company and to the external community
- Raise staff awareness of environmental issues and promote individual good practice
- Require our suppliers to provide goods and services with the minimum adverse environmental impact, and give preference to environmentally aware suppliers whenever possible
- Ensure that we purchase goods and materials which comply with UK government and EU legislation and recognised environmental best practice
- Make efficient and environmentally responsible use of energy, water and other natural resources
- Take all reasonable steps to prevent pollution of both our local and wider environments
- Employ sound waste management practices, including compliance with the requirements of the Producer Responsibility Obligations (Packaging Waste) Regulations
- Develop and maintain emergency procedures to deal effectively with any significant environmental hazards which may arise as a result of our activities

Sustainability

We understand the importance of sustainability - in design, delivery and in continuing operation. *For example*, this is reflected in how we:

- Source high-grade re-usable materials from ethical suppliers
- Work with the local community where appropriate
- Design, manufacture and install energy-efficient products while minimizing waste during installation
- In particular, we ensure that the design of our products meets relevant environmental requirements.
